

Memorandum

TO :

25X1A

DATE: 19 November 1964

FROM : DAD/S&D

SUBJECT:

Reference : Your memorandum of 10 November 1964 Regarding Measurements
on Ionospheric Transmission at 160 Megacycles.

t 1. I consider it very important that your full attention be devoted
to the "R" program for the immediate future.

2. I would like to see some indication that the Program discussed
in reference memorandum is one in which quick reaction is needed. As you
will recall, we established some time ago, the Program Review procedure
whereby programs were to be reviewed before any outside Agency action was
taken. I would like to have (a) your recommendations for assignment in OEL
or ORD if the work is deemed required and desirable to continue, or (b)
your recommendations on how to cancel the work which has now been started.
